STB4 Xenon & LED Tower

The STB4 is a customisable visual signal featuring a tower of 4 AlertAlight L101 type beacons.

Each beacon position can contain either a Xenon or high output L.E.D. light source. The STB4 assembly features a pre-wired junction box and cable loom enabling the end user to determine beacon type and position during installation.

Features

- Multiple configurations of Xenon and LED beacons.
- Internal cable loom and termination PCB simplifies installation.
- Common negative/neutral supply minimises cabling.
- Available with red, white or grey housing.
- High output LED unit can be set to steady or flashing.
- Sealed to IP66.
- Tropicalisation available on request.
- Can be combined with Sonora SONF1 audible signal – see the STA2/3/4 data.

Approvals

- UL & cULs approved: General signalling use.

- EAC compliant: RU D-GB.AL16.B.11083
